Snapshot

An enthusiastic and dedicated individual with a never-ending urge to learn, upskill, and excel in areas of my competence and specialization.

Education

- **Kalinga Institute of Industrial Technology, Deemed to be University**
Currently pursuing BTECH in CSE **May 2027**
CGPA- **8.52/10**
- **FIITJEE Hyderabad**
Telangana State Board of Intermediate Education – **April 2023**
Mathematics, Physics, Chemistry, French, English **Passed with 94.6%**
- **Glendale Academy International School**
Class 10 (CBSE) – Mathematics, Science, Social Science, **April 2021**
French, English **Passed with 96.4%**

Skills

- **Programming Languages known** – C/C++, Java, JavaScript, Python, SQL, HTML5/CSS3
- **Frameworks** – Node.js, Express.js, EJS, PostgreSQL, React, PyTorch
- **Technical Skills** – Data Structures and Algorithms, Full-Stack Web Development, Machine Learning, Artificial Intelligence, NLP, Cloud Computing
- **Tools** - Git/GitHub, Unix Shell, VS Code, Ubuntu/Linux, AWS, Cisco Packet Tracer

Certifications and Achievements

- Full Stack Web Development Course from Udemy [Certificate](#)
- Data Structures and Algorithms using C/C++ Course from Udemy [Certificate](#)
- International Rank 1 in International English Olympiad 2020-21 [Certificate](#)
- AWS Certified Cloud Practitioner CLF-C02 [Certificate](#)

Projects

- **NVD Exploitability Toolkit** | *Hugging Face, PyTorch* Dec 2024 - Apr 2025
 - *Developed an exploitability prediction toolkit using DistilBERT and GPT2-Large, fine-tuned on 56,000+ unique vulnerabilities from NVD (2014-2024).*
 - *DistilBERT achieved 85.6% accuracy, 92.1% precision, and 90.0% F1-score, outperforming GPT2-Large by 16.5%.*
 - *Integrated textual descriptions and numerical CVSS scores to enhance exploit likelihood prediction.*
 - *Code and dataset released for open access: GitHub Repo. **Paper submitted for publication.***

- **AI-Based Intrusion Detection System for WSNs** | *PyTorch, Deep Learning* Oct 2025 - Jan 2026
 - *Developed an AI-based IDS (IDFSWSN-DRL) using TCN and Multi-Head Attention, with GOA-based feature selection reducing feature space by ~68%.*
 - *Achieved 99.09% accuracy with high precision and recall on the WSN-DS dataset, outperforming Naïve Bayes and Random Forest models.*
 - *Enabled efficient detection of complex attacks (Blackhole, Grayhole, Flooding) while maintaining low computational overhead for real-time deployment. **Paper submitted for publication.***

Hobbies and Extracurriculars

- I play and follow the game of football and consider myself good in analyzing the game tactics and playing styles.
- Played in the Hyderabad Cricket Association (HCA) One – Day league (A3) for Sports Zone Cricket Academy.
- Participated in Hackathons (EY techathon 5.0 and Tutedude) where I was managing api calls and backend development.
